GOVERNMENT OF RAJASTHAN

Rajasthan State Pollution Control Board

Rajasthan State E-Waste Management Report

Reporting Period: FY 2025-26 (01 April 2025 - 31 March 2026)

Submitted under the E-Waste (Management) Rules, 2022

Submitting Authority: Rajasthan State Pollution Control Board (RSPCB)

Prepared for: Central Pollution Control Board (CPCB) / Ministry of Environment, Forest and Climate Change (MoEFCC) - National E-Waste Monitoring

Date of Report Generation: 27 July 2026

This report has been compiled from the Rajasthan E-Waste Tracker (2026) maintained by RSPCB. Figures are drawn directly from the underlying data sheets; where indicated, values are illustrative/modeled and are flagged accordingly and should not be treated as verified departmental records pending confirmation.

1. Executive Summary

This report presents the consolidated e-waste management performance of the State of Rajasthan for the reporting period FY 2025-26, compiled from the Rajasthan E-Waste Tracker maintained by the Rajasthan State Pollution Control Board (RSPCB), covering generation, collection, formal recycling, regulatory compliance, informal sector integration, environmental and health safeguards, and awareness outreach, in accordance with the E-Waste (Management) Rules, 2022.

Based on the seven weighted performance categories detailed in Section 11 (Consolidated Scorecard), the State of Rajasthan achieves a computed State E-Waste Management Score of 67.44 out of 100, placing it in the "Good" performance band (Score Bands: 85-100 Excellent, 65-84 Good, 45-64 Needs Improvement, 0-44 Critical, as defined in the 0_Scorecard sheet).

Key strengths and gaps across the seven scored categories are summarised below:

- Strength - Generation & Inventory (Weight 15%): Achievement of 100%, contributing 15 of 15 points. 33/33 districts reporting complete (100%).
- Strength - Environmental & Health Safeguards (Weight 10%): Achievement of 85.71%, contributing 8.57 of 10 points. 85.71% of identified hotspots environmentally monitored.
- Strength - Regulatory Compliance (Weight 15%): Achievement of 78.6%, contributing 11.79 of 15 points. 78.6% entities fully compliant.
- Gap - Formal Recycling & Treatment (Weight 20%): Achievement of 73.34%, contributing 14.67 of 20 points. 73.34% weighted-average material recovery rate, constrained by installed capacity covering only 14.5% of generation.
- Gap - Awareness & Outreach (Weight 10%): Achievement of only 30%, contributing 3.00 of 10 points. 6 programs conducted against a 20-programs/year benchmark.
- Gap - Informal Sector Integration (Weight 10%): Achievement of only 46.67%, contributing 4.67 of 10 points. avg of 57.14% hotspots formalized/partially formalized and 36.20% workers registered/trained = 46.67%.
- Gap - Collection Performance (Weight 20%): Achievement of only 48.71%, contributing 9.74 of 20 points. 48.71% state collection rate.

The State Score components above are computed directly from the eight data sheets of the Rajasthan E-Waste Tracker workbook. The workbook's own scorecard formula cells (Achieved Value / Achievement % / Score Earned) reflect simplified proxy formulas that do not fully align with the category definitions on the "Instructions" sheet; the values shown in this report have been recomputed from the underlying district-, entity-, and site-level data using the category definitions and weights stated on the workbook's "Instructions" and "0_Scorecard" sheets, consistent with the methodology in Section 3.

2. Introduction & Regulatory Context

2.1 Regulatory Framework

The E-Waste (Management) Rules, 2022, notified by the Ministry of Environment, Forest and Climate Change (MoEFCC), govern the environmentally sound management of electrical and electronic equipment waste in India. The Rules establish an Extended Producer Responsibility (EPR) framework under which producers of electrical and electronic equipment (EEE) are required to meet annual e-waste collection and recycling targets, either directly or through authorised Producer Responsibility Organisations (PROs), registered on the CPCB EPR Portal. The Rules also mandate registration and authorisation of recyclers, refurbishers, and dismantlers; prescribe environmentally sound management practices; and require State Pollution Control Boards (SPCBs) / Pollution Control Committees (PCCs) to monitor compliance, oversee informal sector integration, and report periodically to the CPCB and MoEFCC.

2.2 Scope of this Report

This report consolidates Rajasthan's state-level e-waste management performance for the reporting period FY 2025-26 across seven functional areas, each corresponding to a dedicated data sheet in the Rajasthan E-Waste Tracker workbook:

- Generation & Inventory - district-wise e-waste generation by equipment category (Sheet: 1_Generation_Inventory)
- Collection Performance - district-wise collection against generation and EPR targets (Sheet: 2_Collection_Log)
- Formal Recycling & Treatment - authorised recycler/dismantler capacity and throughput (Sheet: 3_Recycling_Infrastructure)
- Regulatory Compliance - producer/EPR entity compliance status, inspections, and penalties (Sheet: 4_Compliance_Tracker)
- Informal Sector Integration - informal cluster identification and formalisation (Sheet: 5_Informal_Sector_Hotspots)
- Environmental & Health Safeguards - site monitoring and health camps (Sheet: 6_Env_Health_Monitoring)
- Awareness & Outreach - public awareness campaigns and collection drives (Sheet: 7_Awareness_Programs)

The report is intended for submission by RSPCB to the CPCB / MoEFCC for national-level review and monitoring of state performance under the E-Waste (Management) Rules, 2022.

3. Methodology

3.1 State Score Calculation

The overall State E-Waste Management Score (out of 100) is calculated as the weighted sum of seven category-level achievement percentages, using the weights and benchmarks defined on the "0_Scorecard" sheet of the Rajasthan E-Waste Tracker:

#	Category	Weight	Primary Data Source Sheet
1	Generation & Inventory	15%	1_Generation_Inventory
2	Collection Performance	20%	2_Collection_Log
3	Formal Recycling & Treatment	20%	3_Recycling_Infrastructure
4	Regulatory Compliance	15%	4_Compliance_Tracker
5	Informal Sector Integration	10%	5_Informal_Sector_Hotspots
6	Environmental & Health Safeguards	10%	6_Env_Health_Monitoring
7	Awareness & Outreach	10%	7_Awareness_Programs

3.2 Basis of Achieved Values

Each category's Achieved Value has been computed directly from the underlying data, using the indicator definitions given on the "Instructions" sheet, as follows:

- Category 1 (Generation & Inventory): measured as district reporting completeness - 33 of 33 districts submitted complete category-wise generation data for the period, i.e. 100%.
- Category 2 (Collection Performance): measured as the state-level collection rate, i.e. total quantity collected divided by total quantity generated (Section 5).
- Category 3 (Formal Recycling & Treatment): measured as the quantity-weighted average material recovery rate achieved by authorised recyclers/dismantlers (Section 6). Installed-capacity and throughput adequacy are reported separately as context metrics in Section 6 and are not double-counted in the score.
- Category 4 (Regulatory Compliance): measured as the percentage of registered producers/EPR entities with a "Compliant" status (Section 7).
- Category 5 (Informal Sector Integration): measured as the simple average of (a) the percentage of identified informal hotspots that are Formalized or Partially Formalized, and (b) the percentage of estimated informal workers who are registered/trained (Section 8).
- Category 6 (Environmental & Health Safeguards): measured as the percentage of identified informal hotspots that received at least one environmental monitoring visit during the period (Section 9).
- Category 7 (Awareness & Outreach): measured against the benchmark of 20 programs/year entered on the "0_Scorecard" sheet; 6 programs were recorded in the "7_Awareness_Programs" sheet for the period (Section 10).

Achievement % for each category is capped at 100% and Score Earned = Weight x Achievement %. The workbook's own auto-computed scorecard formulas use simplified proxy references (e.g. EPR-target-to-generation ratio for Category 2, installed-capacity-to-collection ratio for Category 3) that do not fully match these definitions; the figures in this report reflect the definitions above rather than the raw formula outputs, and RSPCB should align the "0_Scorecard" formulas with these definitions before the next reporting cycle (see Section 13).

3.3 Data Verification Status

Producer/EPR entity names in Section 7 (Regulatory Compliance) are recorded in the workbook using generic placeholder labels (e.g., "Registered Producer / EPR Entity 1"). These are retained as-is in this report and are illustrative placeholders pending verified RSPCB/CPCB registration records; they should not be read as actual registered entity names. Recycler/dismantler names in Section 6 include real RSPCB-listed facility names (e.g. in Jaipur and the Bhiwadi industrial belt of Alwar district) alongside placeholder entries pending full verification. All numeric figures are traceable to specific rows/columns of the eight-sheet Rajasthan E-Waste Tracker workbook, as cited in each section below.

4. State E-Waste Generation Profile

Source: 1_Generation_Inventory sheet. All 33 districts of Rajasthan reported complete category-wise generation data for the period, updated as of 31-03-2026.

State-level total e-waste generation for the reporting period is 7,61,06,330 kg, equivalent to 76,106.33 metric tonnes (converted from kg as the total exceeds 1,000 kg), across a total reporting population of 7,77,65,460.

4.1 Category-wise Generation Breakup (State Total)

Equipment Category	Quantity	% of State Total
IT & Telecom	2,35,92,970 kg (23592.97 t)	31.00%
Consumer Electrical & Electronics	1,75,04,450 kg (17504.45 t)	23.00%
Large & Small Equipment	1,44,60,210 kg (14460.21 t)	19.00%
Lighting Equipment	68,49,550 kg (6849.55 t)	9.00%
Batteries	91,32,760 kg (9132.76 t)	12.00%
Other	45,66,390 kg (4566.39 t)	6.00%

IT & Telecom equipment is the single largest contributing category statewide, followed by Consumer Electrical & Electronics and Large & Small Equipment. Higher per-capita generation is concentrated in the more urbanised and industrialised districts (Jaipur, Jodhpur, Kota, Udaipur, Ajmer, Bikaner), consistent with denser consumer-electronics markets, IT/ITeS activity, and industrial equipment turnover, while the desert and predominantly rural districts of western and southern Rajasthan show markedly lower per-capita generation.

4.2 District-wise Ranking (Top 10 Generators)

Rank	District	Population	Total Generated	Per-Capita Generation
1	Jaipur	77,02,120	1,03,97,860 kg (10397.86 t)	1.350 kg
2	Jodhpur	43,21,310	58,33,770 kg (5833.77 t)	1.350 kg
3	Udaipur	35,19,100	47,50,780 kg (4750.78 t)	1.350 kg
4	Bikaner	29,67,630	40,06,300 kg (4006.30 t)	1.350 kg
5	Alwar	41,93,110	39,83,450 kg (3983.45 t)	0.950 kg
6	Ajmer	28,77,730	38,84,940 kg (3884.94 t)	1.350 kg
7	Nagaur	37,01,500	35,16,420 kg (3516.42 t)	0.950 kg
8	Kota	22,46,040	30,32,150 kg (3032.15 t)	1.350 kg
9	Sikar	29,60,020	28,12,020 kg (2812.02 t)	0.950 kg
10	Bharatpur	28,84,850	27,40,610 kg (2740.61 t)	0.950 kg

4.3 District-wise Ranking (Lowest 5 Generators)

Rank	District	Population	Total Generated	Per-Capita Generation
29	Rajsamand	12,79,790	7,93,470 kg (793.47 t)	0.620 kg
30	Bundi	12,16,980	7,54,530 kg (754.53 t)	0.620 kg
31	Sirohi	11,76,160	7,29,220 kg (729.22 t)	0.620 kg
32	Pratapgarh	9,90,420	6,14,060 kg (614.06 t)	0.620 kg

Rank	District	Population	Total Generated	Per-Capita Generation
33	Jaisalmer	8,02,040	4,97,260 kg (497.26 t)	0.620 kg

4.4 Narrative Analysis

Jaipur, Jodhpur and Udaipur rank as the three highest-generating districts in absolute terms, consistent with their large populations and higher degrees of urbanisation, IT/ITeS presence, and industrial activity. Jaisalmer, Pratapgarh and Sirohi record the lowest absolute generation, reflecting smaller and more sparsely populated desert districts. Per-capita generation varies far more widely across Rajasthan's districts than in more uniformly urbanised states - ranging from approximately 0.62 kg/person in rural/desert districts to 1.35 kg/person in the six most urbanised districts (Jaipur, Jodhpur, Kota, Udaipur, Ajmer, Bikaner) - reflecting genuine differences in consumption patterns, industrial density, and urbanisation rather than a single flat per-capita assumption; this tiered approach should still be validated against ground-level waste characterisation studies in future reporting cycles.

5. Collection Performance

Source: 2_Collection_Log sheet, cross-referenced with generation figures from 1_Generation_Inventory.

State collection rate = Total Collected / Total Generated = 3,70,73,110 kg / 7,61,06,330 kg = 48.71%. State-level EPR collection achievement stands at 4,22,81,020 kg against an EPR collection target of 5,70,79,740 kg, i.e. 74.07% of target. A total of 354 registered collection centers are recorded statewide across all districts.

5.1 District-wise Collection Performance (Top 10 by Generation)

District	Generated (kg)	Collected (kg) [Rate %]	Reg. Collection Centers	EPR Target (kg)	EPR Achieved (kg) [%]
Jaipur	1,03,97,860	60,30,760 (58%)	35	77,98,400	65,89,650 (84.50%)
Jodhpur	58,33,770	33,83,590 (58%)	20	43,75,330	36,97,150 (84.50%)
Udaipur	47,50,780	27,55,450 (58%)	16	35,63,080	30,10,800 (84.50%)
Bikaner	40,06,300	23,23,650 (58%)	13	30,04,720	25,38,990 (84.50%)
Alwar	39,83,450	18,32,390 (46%)	19	29,87,590	21,21,190 (71.00%)
Ajmer	38,84,940	22,53,270 (58%)	13	29,13,700	24,62,080 (84.50%)
Nagaur	35,16,420	16,17,550 (46%)	17	26,37,320	18,72,500 (71.00%)
Kota	30,32,150	17,58,650 (58%)	10	22,74,110	19,21,620 (84.50%)
Sikar	28,12,020	12,93,530 (46%)	13	21,09,020	14,97,400 (71.00%)
Bharatpur	27,40,610	12,60,680 (46%)	13	20,55,460	14,59,380 (71.00%)

5.2 Narrative Assessment

Against the benchmark entered on the "0_Scorecard" sheet (100% collection target), the state's achieved collection rate of 48.71% represents a shortfall of 51.29 percentage points. Collection activity statewide draws on a mix of urban local body / municipal corporation collection drives, RIICO industrial-area collection points (notably around Jaipur, Jodhpur and the Bhiwadi-Chopanki industrial belt in Alwar district), and registered EPR collection centers. Collection performance is markedly stronger in the six most urbanised districts (average collection rate of 58%) than in the state's rural and desert districts (average collection rate of 33%), indicating that expanding registered collection infrastructure in lower-density districts is the most direct lever for improving the state collection rate.

6. Formal Recycling & Treatment Infrastructure

Source: 3_Recycling_Infrastructure sheet.

Recycler / Dismantler	Authorisation No.	District	Installed Capacity (t/yr)	Processed This Year (t)	Material Recovery
ETCO E-Waste Recycler Pvt. Ltd.	RSPCB/CPCB Authorised E-Waste Dismantler/Recycler	Jaipur	4200	2650	78%
Green India Waste Management (Bhiwadi)	RSPCB Authorised Dismantler/Recycler	Alwar	3100	2080	74%
Telsys Green Web Recycling Pvt. Ltd.	RSPCB Authorised E-Waste Recycler	Jaipur	1500	940	71%
EPR-authorised Collection-cum-Dismantling Unit 1	RSPCB Authorised Dismantler	Jodhpur	900	560	66%
EPR-authorised Collection-cum-Dismantling Unit 2	RSPCB Authorised Dismantler	Udaipur	700	410	64%
EPR-authorised Collection-cum-Dismantling Unit 3	RSPCB Authorised Dismantler	Kota	600	345	63%

Entity names labelled "EPR-authorised Collection-cum-Dismantling Unit 1-3" are placeholder identifiers pending verified RSPCB/CPCB authorisation records and should not be presented as final registered entity names in the national submission. The remaining three facilities correspond to real RSPCB-listed e-waste recyclers operating in the Jaipur (VKI/Manda industrial areas) and Bhiwadi-Chopanki (Alwar) industrial belts, which are Rajasthan's principal formal e-waste processing clusters.

6.1 Capacity vs. Generation Adequacy

Total installed authorised recycling/dismantling capacity statewide is 11,000 tonnes/year, against total state e-waste generation of 76,106.33 tonnes/year for the period - an installed-capacity-to-generation ratio of 14.5%. Total quantity actually processed by authorised recyclers this year is 6,985 tonnes, or 9.18% of total state generation, indicating a substantial material adequacy gap: installed capacity, and actual throughput even more so, remain well below the volume of e-waste generated statewide, and considerably more constrained than the corresponding ratios reported by smaller, more compact states.

6.2 Material Recovery Performance

The simple average material recovery rate across the six listed authorised facilities is 69.33%; the quantity-weighted average (weighted by tonnes processed) is 73.34%. ETCO E-Waste Recycler Pvt. Ltd., the largest facility by both installed capacity and throughput, records the highest recovery rate among listed facilities at 78%.

7. Regulatory Compliance

Source: 4_Compliance_Tracker sheet. 14 registered producers/EPR entities are recorded for the state.

Metric	Value
Total Registered Producers / EPR Entities	14
Compliant	11 (78.6%)
Partially Compliant	2 (14.3%)

Metric	Value
Non-Compliant	1 (7.1%)
Inspections Planned	13
Inspections Conducted	11 (84.6% of planned)
Penalties / Show-Cause Issued	3
Penalties Resolved	0 (0.0% of issued)

Entity names labelled "Registered Producer / EPR Entity 1-14" are placeholder identifiers pending verified RSPCB/CPCB EPR registration records and should not be presented as final registered entity names in the national submission.

7.1 Non-Compliant / Partially Compliant Entities

Entity	EPR Reg. No.	Status	Inspection / Penalty Status	Remarks
Registered Producer / EPR Entity 4	EPR/2024/RJ/004	Partially Compliant	Planned: Yes / Conducted: Yes / Penalty: Yes	EPR target under-achieved; show-cause issued
Registered Producer / EPR Entity 7	EPR/2024/RJ/007	Non-Compliant	Planned: Yes / Conducted: Yes / Penalty: Yes	Penalty proceedings ongoing
Registered Producer / EPR Entity 11	EPR/2024/RJ/011	Partially Compliant	Planned: Yes / Conducted: Yes / Penalty: Yes	Partial EPR target achieved; corrective action plan sought

8. Informal Sector Integration

Source: 5_Informal_Sector_Hotspots sheet.

Hotspot / Cluster	District	Status	Est. Workers	Workers Reg./Trained	Formalization Action Taken
Informal E-Waste Cluster - Bhiwadi Industrial Belt	Alwar	Partially Formalized	140	58	Registered as collection point; workers trained under skill program
Informal E-Waste Cluster - Jaipur Scrap Market (Kanti Chandra Road)	Jaipur	Partially Formalized	95	40	Awareness + registration drive conducted
Informal E-Waste Cluster - Jodhpur Scrap Yard	Jodhpur	Not Formalized	60	8	Initial survey conducted
Informal E-Waste Cluster - Kota Scrap Cluster	Kota	Formalized	35	35	Fully integrated into authorised collection network
Informal E-Waste Cluster - Udaipur Recycling Belt	Udaipur	Partially Formalized	55	19	Skill training conducted for scrap workers
Informal E-Waste Cluster - Bikaner Scrap Market	Bikaner	Not Formalized	38	0	Site identified, action plan pending
Informal E-Waste Cluster - Bharatpur Kabadi Market	Bharatpur	Not Formalized	30	4	Initial survey conducted

8.1 Analysis

Of 7 identified informal e-waste clusters statewide, 1 (14.3%) are fully Formalized, 3 (42.9%) are Partially Formalized, and 3 (42.9%) remain Not Formalized - a combined 57.14% formalized or partially formalized. Of an estimated 453 informal workers across these clusters, 164 (36.20%) have been registered or trained to date. The Bhiwadi industrial belt in Alwar district - Rajasthan's largest and best-known informal e-waste and scrap-processing cluster - accounts for the largest single share of both estimated workers and registered/trained workers, and remains Partially Formalized with remediation ongoing. Outstanding action items include progressing the Bikaner and Bharatpur clusters beyond their initial-survey stage, both of which remain Not Formalized.

9. Environmental & Health Safeguards

Source: 6_Env_Health_Monitoring sheet.

Site / Hotspot	District	Monitoring Type	Date	Result	Health Camp	Beneficiaries
Informal E-Waste Cluster - Bhiwadi Industrial Belt	Alwar	Soil + Water	12-05-2026	Exceeds Limit (Pb, Cd)	Yes	260
Informal E-Waste Cluster - Jaipur Scrap Market (Kanti Chandra Road)	Jaipur	Soil	18-05-2026	Exceeds Limit (Pb)	Yes	190

Site / Hotspot	District	Monitoring Type	Date	Result	Health Camp	Beneficiaries
Informal E-Waste Cluster - Jodhpur Scrap Yard	Jodhpur	Water	22-05-2026	Exceeds Limit (Hg)	No	0
Informal E-Waste Cluster - Kota Scrap Cluster	Kota	Soil + Water	28-05-2026	Within Limit	Yes	110
Informal E-Waste Cluster - Udaipur Recycling Belt	Udaipur	Air + Soil	03-06-2026	Exceeds Limit (particulate matter)	Yes	150
Informal E-Waste Cluster - Bikaner Scrap Market	Bikaner	Soil	09-06-2026	Within Limit	No	0

9.1 Exceedance Flags

- Informal E-Waste Cluster - Bhiwadi Industrial Belt (Alwar) - Exceeds Limit (Pb, Cd). Follow-up: Follow-up remediation plan submitted to RSPCB.
- Informal E-Waste Cluster - Jaipur Scrap Market (Kanti Chandra Road) (Jaipur) - Exceeds Limit (Pb). Follow-up: Follow-up remediation planned.
- Informal E-Waste Cluster - Jodhpur Scrap Yard (Jodhpur) - Exceeds Limit (Hg). Follow-up: Health camp scheduled next quarter.
- Informal E-Waste Cluster - Udaipur Recycling Belt (Udaipur) - Exceeds Limit (particulate matter). Follow-up: Follow-up remediation planned.

4 of 6 monitored sites (66.7%) recorded results exceeding prescribed environmental limits, primarily for heavy metals (lead, cadmium, mercury) and particulate matter. 4 health camps were conducted across the monitored sites, screening a total of 710 beneficiaries. Of the 7 identified informal hotspots (Section 8), 6 (85.71%) received at least one environmental monitoring visit during the period; the remaining hotspot (Bharatpur) has not yet been monitored.

10. Awareness & Outreach

Source: 7_Awareness_Programs sheet.

Program Name	District	Date	Type	Target Audience
Statewide E-Waste Buyback & Swachhata Campaign	Statewide (launched Jaipur)	05-06-2025	Household E-Waste Buyback / Collection Drive	General public / households (statewide)
E-Waste Awareness Drive - Government Schools	Jaipur	20-04-2026	School Collection Drive	Students, Grades 6-10
Bhiwadi Industrial Belt E-Waste Sensitisation Drive	Alwar	27-04-2026	Industrial/Worker Awareness Drive	Informal & industrial e-waste workers
Digital Rajasthan Week E-Waste Awareness	Jodhpur	08-05-2026	Public Awareness Campaign	General public
College Campus E-Waste Collection	Kota	15-05-2026	School Collection Drive	College students
RWA Community E-Waste Collection Drive	Udaipur	22-05-2026	RWA/Community Drive	Residents' Welfare Associations

A total of 6 awareness/outreach programs were conducted statewide during the period, against the benchmark target of 20 programs/year set on the "0_Scorecard" sheet - an achievement of 30% of target. Of these, 3 were school- or RWA/community-based collection drives. A cumulative 10,830 participants were reached statewide across all programs.

11. Consolidated Scorecard

Recomputed from the 0_Scorecard sheet per the methodology in Section 3.

#	Category	Weight	Benchmark / Target	Achieved Value	Achievement %
1	Generation & Inventory	15%	33 districts (100%)	33/33 districts reporting complete (100%)	100%
2	Collection Performance	20%	1 (i.e., 100% collection target)	48.71% state collection rate	48.71%
3	Formal Recycling & Treatment	20%	1 (i.e., 100% material recovery target)	73.34% weighted-average material recovery rate	73.34%
4	Regulatory Compliance	15%	1 (i.e., 100% compliance target)	78.6% entities fully compliant	78.57%
5	Informal Sector Integration	10%	1 (i.e., 100% formalization target)	avg of 57.14% hotspots formalized/partially formalized and 36.20% workers registered/trained	46.67%
6	Environmental & Health Safeguards	10%	1 (i.e., 100% monitoring coverage target)	85.71% of identified hotspots environmentally monitored	85.71%

#	Category	Weight	Benchmark / Target	Achieved Value	Achievement %
7	Awareness & Outreach	10%	20 programs/year	6 programs conducted	30%

TOTAL STATE SCORE: 67.44 / 100 - Performance Band: Good

Score Bands (per 0_Scorecard sheet): 85-100 Excellent | 65-84 Good | 45-64 Needs Improvement | 0-44 Critical.

12. Key Findings & Gap Analysis

12.1 Strongest-Scoring Categories

- Generation & Inventory (Section 4): 100% of districts (33/33) reported complete category-wise data, reflecting strong data-collection discipline across the state.
- Environmental & Health Safeguards (Section 9): 85.71% of identified informal hotspots received at least one monitoring visit, with health camps reaching 710 beneficiaries.
- Regulatory Compliance (Section 7): 78.6% of registered producers/EPR entities are recorded as Compliant, with inspections conducted for 11 of 13 planned inspections.

12.2 Weakest-Scoring Categories

- Awareness & Outreach (Section 10): only 6 of a 20-program annual benchmark were conducted (30%), the largest shortfall among all seven categories.
- Informal Sector Integration (Section 8): while 57.14% of hotspots have some degree of formalization, only 36.20% of an estimated 453 informal workers have been registered or trained, leaving the majority of the informal workforce outside formal safety and livelihood safeguards.
- Collection Performance (Section 5): the state collection rate of 48.71% falls well short of the 100% benchmark, with pronounced disparity between urbanised districts (~58%) and rural/desert districts (~33%).
- Formal recycling throughput remains structurally constrained: installed authorised capacity covers only 14.5% of state generation, and actual quantity processed only 9.18%, even though the recovery rate achieved on processed material is comparatively strong at 73.34% (Section 6).

13. Recommendations

- 1. Expand authorised formal recycling/dismantling capacity beyond the Jaipur and Bhiwadi (Alwar) clusters, and fast-track authorisation of additional recyclers/dismantlers in Jodhpur, Udaipur, Kota and Bikaner, to close the gap between installed capacity (currently 14.5% of generation) and actual generation.
- 2. Strengthen EPR enforcement and district-level collection infrastructure to raise the state collection rate from the current 48.71% toward the 100% benchmark, prioritising expansion of registered collection centers in the rural and desert districts where collection rates trail the urbanised-district average by roughly 25 percentage points.
- 3. Scale up awareness and outreach programming substantially - current performance (6 of a 20-program annual target) is the weakest-scoring category; RSPCB should set a district-wise quarterly awareness-campaign calendar to close this gap.
- 4. Accelerate worker registration/training for the informal sector - only 36.20% of an estimated 453 informal workers are currently registered/trained; prioritise the Bikaner cluster (Not Formalized, 0 workers registered) and the Bharatpur cluster (Not Formalized, action plan pending).
- 5. Extend environmental and health monitoring to the one remaining un-monitored informal hotspot (Bharatpur), and schedule the pending health camp for the Jodhpur site flagged with a mercury exceedance (Section 9).
- 6. Pursue time-bound resolution of the 3 outstanding penalty/show-cause proceeding(s) against non-compliant/partially compliant EPR entities (Section 7), and complete the 2 pending inspection(s) planned but not yet conducted.
- 7. Align the "0_Scorecard" sheet's auto-computed formulas with the category definitions on the "Instructions" sheet (Section 3.2), so that future scorecards compute each category's Achievement % without manual reinterpretation.
- 8. Replace placeholder producer/EPR entity names in the Compliance Tracker with verified RSPCB/CPCB registration records ahead of the next formal submission to CPCB/MoEFCC, to ensure the report reflects verified rather than illustrative data.

14. Annexures - Full Raw Data Tables

The following tables reproduce the complete district-level and entity-level data from all eight sheets of the Rajasthan E-Waste Tracker workbook, for verification and audit purposes.

Annexure A - Sheet 1: Generation Inventory (Full, all 33 districts)

District	Population	Total Generated (kg)	Total (t)
Jaipur	77,02,120	1,03,97,860	10397.86
